iPad grading guide

Cosmetic condition / Testing status / Battery requirements

Tested and Untested identify testing status separately from cosmetic grade. Tested refers to the stated checks; confirm the exact QC scope and batch notes before purchase. Untested does not mean every unit is faulty, and does not guarantee full functionality.

Tested devices

A Grade - Minimal Signs of Use

Minimal signs of use, with no deep screen scratches or dents. Battery health >=90%.

Battery health >=90%

AB Grade - Light Signs of Use

Light signs of use, with fine screen scratches and minor frame dents. Battery health >=80%.

Battery health >=80%

B Grade - Noticeable Signs of Use

Noticeable signs of use, with fine screen scratches and minor frame dents. Battery health >=80%.

Battery health >=80%

Untested devices

Full functions are not verified. Any stated power-on or LCD condition is a limited observation. Unknown faults may be present. Battery health is unverified unless an explicit threshold is stated.

C Grade - Screen Scratches & Frame Dents

Visible screen scratches and frame dents. Battery health not tested.

Battery health not tested

Battery health is not tested / verified.

D Grade - Working LCD

Working LCD; conditions may include heavy wear, severe backlight issues, cracked glass or a damaged fingerprint sensor. Battery health not tested.

Battery health not tested

Battery health is not tested / verified.

E Grade - LCD or Functional Faults

Faulty LCD or a device that does not work properly, with heavy wear. Battery health not tested.

Battery health not tested

Battery health is not tested / verified.

Before ordering

Confirm model, storage, grade mix, testing scope, battery requirements, lock status and batch-specific exceptions in the agreed order specification. Cosmetic grade alone does not establish battery health or activation / account-lock status.
